

SPACE

Design by

Pagnon & Pelhaître

Description

Between virtual and reality... Space is a new graphic storage program. Starting with the simple idea of freely stacking 3 different volumes, either square or rectangular, the designers envisioned joining them with their virtual doubles, identical volumes in metal frames. They play with space, the full and the empty. The combinations are infinite. The lacquered finish or cherry veneered solid volumes are combined with white, black or copper as their virtual counterparts.

Contrasting the empty with the full, mixing open spaces with more or less full ones, combining satin white and cherry with black chrome, white lacquered or copper space; the thrill comes from the fact that emptiness has its own structure in space. It's an innovative touch rooted in the idea of designing the void.

The open cubes become a peripheral prism. Space also follows the trend of mixing materials, especially metal and wood. A very attractive storage unit with a price, this program embodying the spirit of the times, targets a young urban clientele.

Technical Specifications

TECHNICAL DESCRIPTION

- 3 sizes of chests: Small L34.5 - Medium L69 - Large 103.5
- Fronts: satin white lacquered or cherry wood stained with natural varnish. It is not possible to combine white fronts with cherry wood chests.
- Composition of the chests: the Small always comes with 2 drawers of unequal size, the

larger one in the lower part (slides all the way out). The Medium is available in 3 versions (1 open compartment, 2 drawers or 1 flap). The Large comes with a flap, and inside with a partition, that's always on the right and defines 1/3 of the volume or version for hanging files.

This chest can accommodate a TV, because of the support from the partition. The medium and large chests can take an optional cable pass-through.

- 2 Frame sizes: 1 simple frame and 1 double frame, available in 3 finishes (brilliant black chrome, brilliant copper or satin white lacquered).

-The Cabinet Finishes: cabinet is in MDF 16 mm panel with mitered edges.

Cabinet MDF satin white lacquer and satin white fronts.

Cabinet MDF satin white lacquer and fronts in cherry wood natural varnish.

Cabinet in total cherry wood veneer.

Floor Fixation: Set on plinths (16 mm thick) set back, invisible, adjustable cylindrical jacks. The cabinets are attached to each other laterally and vertically by default.

Fixation to the wall: the back of the cabinet is pre-drilled when specified to allow installation of fixation hardware. A suspension kit is installed to each individual chest. The chest will rest on a rail that is fixed to the wall, and is suspended.

Handles: Brilliant black chromed or white lacquered.

Flap has a cable compass with a satin white lacquered amortization.
