

SUNGLASS 002 coffeetable

Design

Rodolfo Dordoni

Description

Coffee table

Structure

Aluminium frame treated with electrostatic powder painting with polyester base that gives more protection from scratches and also the final coloring to the product.

Glass Top

Ribbed glass

Laminated glass made up of two 4-mm high sheets each, one in extra-clear crystal and one in fluted glass. Between the two sheets a vinyl safety film is applied, which intervenes in case of breakage. The edge is rounded and polished.

Bronzed glass

Hardened glass, 8 mm high, polished brass bronze coloured.

Lower Top

Hpl

High pressure laminate (HPL) extremely resistant to wear, impact, scratch, moisture, heat and stain; it has good hygienic and anti-static properties.

Farsena

it has a typical gray-brown color and an uniform structure with shades of red and salts.

The brushed finish and the stain-resistant treatment with opaque effect preserve the natural appearance of the stone and its pleasantness to the touch.

Luna Stone

Sandstone with a typical grey/light blue color, brushed with a natural effect.

Carrara Marble

The slabs of marble have a pearlwhite color and slight grey veins which do not decrease the value of the stone. The Carrara marble used for our products is treated with acid, with a natural effect and it is protected with a light oil-repellent treatment.

Weight

Structure + glass: 24kg - Structur + glass + lower top HPL: 36 kg (+ lower top stone: 60 kg)

Maintenance

Aluminium

In case of exposition to weather conditions it is recommended to wash regularly the product with mild and fresh water. If the product needs a thorough cleaning, use a neutral soap (UNIVERSAL CLEANER) and warm or hot water. Dry immediately to avoid stains and halos caused

by water.

Brush following the direction of polish (if the product is not painted) and use a microfiber cloth to obtain a better result.

Top e lower top

Use a damp cloth wrung out in water; in the event of having to remove obstinate stains, use a universal detergent. Never use abrasive materials, acid substances or aggressive chemical solvents.
